Flight Crew Manual FCM

Version 10 02/2010

Tom A300-600

Flight Crew Manual FCM

1. Flight Deck Controls

1.0. Overview

1) Overhead panel. See section 1.1.

2) Main panel. See section 1.3.

3) Pedestal panel. See section 1.4

4) Armrest panel. See section 1.5

a) Sunshield. To activate/deactivate click on the brown areas.

b) Rudder pedals (not clickable)

c) Moving windshield wipers. Activated by switch on the overhead panel

d) Opening cockpit windows (on ground only). Click on the frames to open or close.

e) Yokes (not clickable)

Almost all gauges of the VC are also present on the 2D-panel. Gauges which are not part of the 2D-panel are marked in green. The layout of the 2D-panel is also almost identical to the VC. Just that the pedestal and the overhead have been split into two 2d-panels each (pedestal and radio, overhead and fuel) to get a better layout on the screen.

Flight Crew Manual FCM

2. External 2.1 Doors

Starboardside

Portside

- A) Main passenger door (Shift+e 1)
- B) Rear passenger door, Cabin crew entrance (Shift+e 3)
- C) Other passenger doors (Shift+e 4)
- D) Cargo doors (Shift+e 2)
- E) APU inlet (opens when APU is active)

(Shift+e X) means that you "press and hold" **Shift**, press and release **e**, release shift and press key **X (1,2,3 or 4)** quickly after that.

Pressing **Shift+e** alone, without a following number, will only open door (A).

Version 10 02/2010

Tom A300-600

Flight Crew Manual FCM

2.2 Jetheat, jetwash, hot air,...

A) Main engine "jetheat" effect, two stages.

B) APU "jetheat" effect

The model has a non-removable jetheat effect attached to its engines and APU. The effect is disabled (invisible) by default, but can be activated by pressing the default "tailhook" key command.
