

Tom A300B classic

Maintenance Facility Planing

MFP

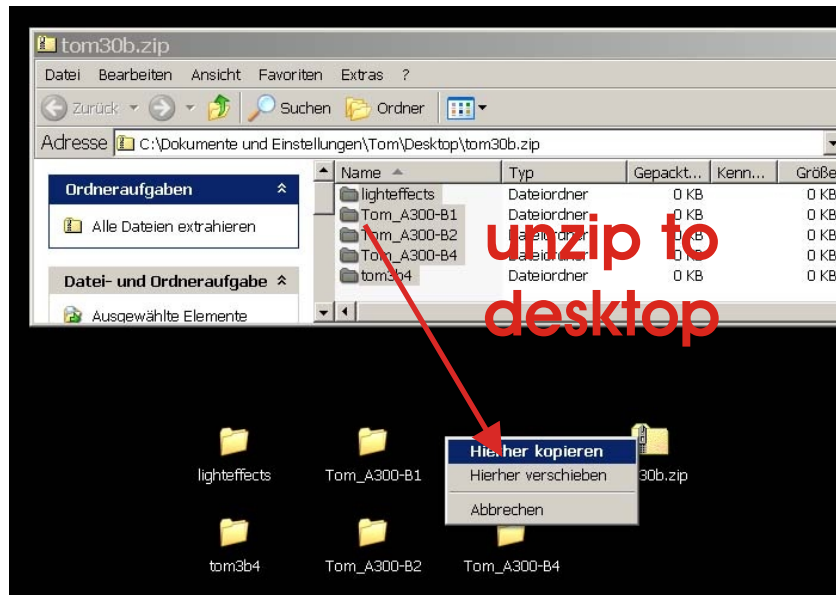

Version 01 07/2010

Tom A300B classic

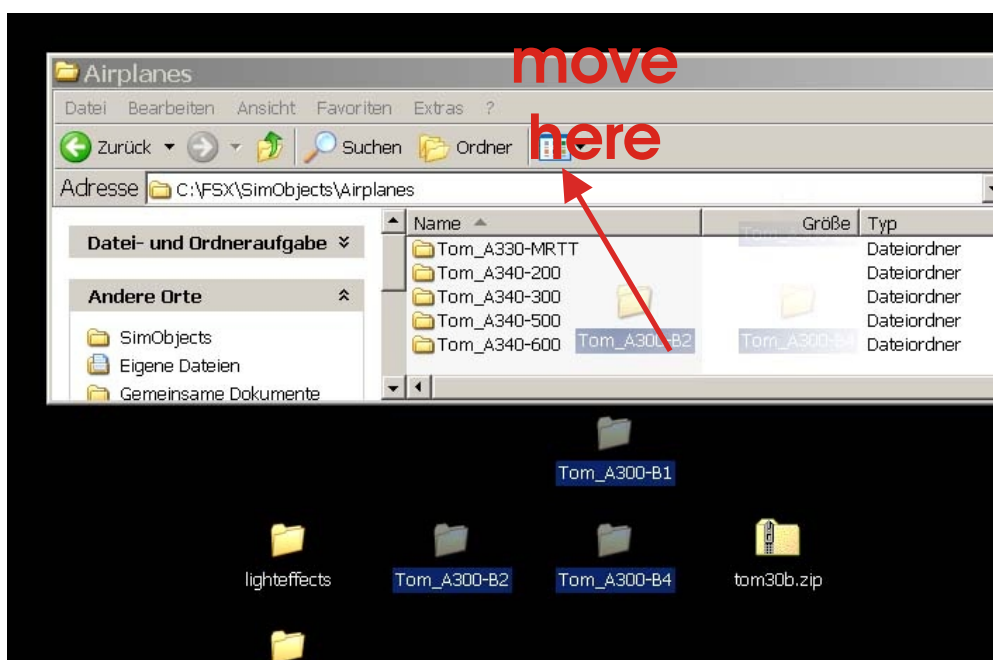

Maintenance Facility Planing MFP

1.Installation in FSX

- 1) Unzip **TOM30b.ZIP** to your desktop

- 2) Move the complete folders **Tom_A300-B4**, **Tom_A300-B2** and **Tom_A300-B1** into your FSX/SimObjects/Airplanes folder.

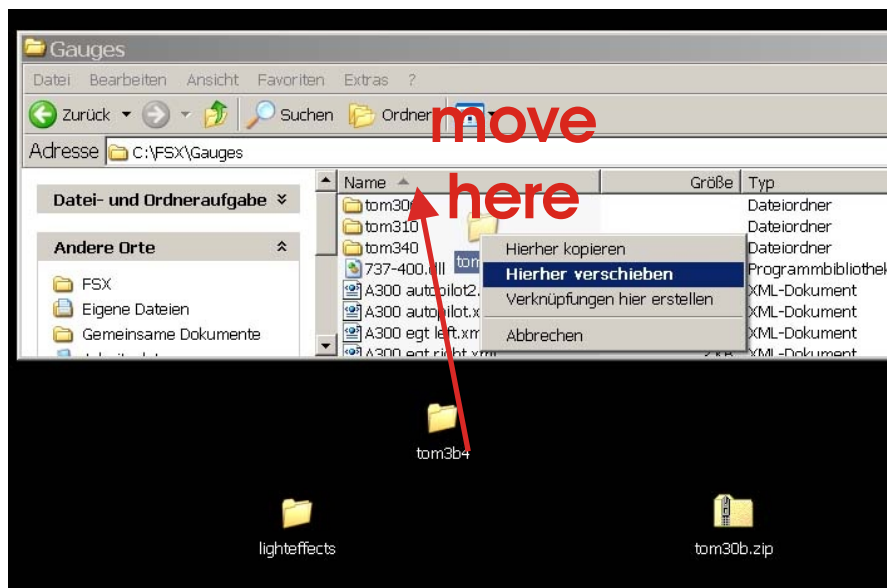

Version 01 07/2010

Maintenance Facility Planing MFP

- 3) Move the complete **tom3b4** folder into your FSX/Gauges folder. Do not copy content of the tom3b4 folder, just move the complete folder as it is in one piece!

- 4) Move all files from the **lighteffects** folder into your FSX/Effects folder. They are identical to all my other FSX Airbus releases, so if you have already one of them installed, you dont need these files.

Version 01 07/2010

5. KnownBugs

- 1) Disapearing or flashing lights:
Try to increase the "NUM_LIGHTS" in the fsx.cfg from 8 to 10
- 2) Flight envelope protection (Fly by wire)
If you want to activate the FSX fly by wire function, just open the **aircraft.cfg** and remove the // in front of the entrie **fly_by_wire=1** of the **[airplane_geometry]** section.
Just notice that the A300B does not have a full Fly by wire function.
- 3) The flightmodel is not as good as it should be since i am not an FDE specialist, so this is all i can do for now. Feel free to change wahtever you want.
- 4) Multiplayer Mode: The aircraft is multiplayer compatible!! No separate mdl's are needed.
- 5) Repaints.
Repaint resources are included. Freeware repaints are allowed. Read the copyright.txt which is included in the main zip file.
- 6) The cockpit of the B1 prototype F-WUAB is based on a single black and white picture. Main panel and glareshield are quite accurate, overhead and engineer panel base on the B2 version. Pedestal panel model is quite good, but the gauge placement is fictional.

**YOU NEED AT LEAST FSX SERVICE PACK
1 OR 2 TO RUN THIS AIRCRAFT.
IF YOU DONT HAVE A SERVICE PACK
INSTALLED, THE AIRCRAFT WILL STAY
TRANSPARENT OR BLACK EXCEPT FOR
THE COCKPIT AND WINGS**
