

El Formosa – Taiwan Scenery Project Part 11

Introduction

Taoyuan International Airport (ICAO: RCTP, IATA: TPE) , formerly known as Chiang Kai-shek International Airport or CKS International Airport, is the largest and busiest airport of the Nation Taiwan. As of 2010, it is the fifteenth busiest air freight hub in the world, and thirteenth busiest airport in terms of international passenger traffic. Two Taiwanese international airlines, China Airlines and EVA Airways, site their home at RCTP. After taking a shuttle bus to the nearby Taiwan High Speed Rail (HSR) Taoyuan station, travelers can reach the capital, Taipei City (24 km), in less than one hour, or the southern business and industrial center of Kaohsiung City (about 300 km, RCKH, el Formosa-Taiwan Scenery Part 10) in two hours.

After over 30 years of operation since 1979, Taoyuan International Airport is currently undergoing its most extensive renovation and expansion to bring back its prestige as the “National Gateway for Taiwan”. This will be a totally makeover project for RCTP. The first stage is scheduled to be completed in 2013 or 2014. By then, the airport will have a brand new look, such as a rebuilt Terminal 1.

El Formosa – Taiwan Scenery Project Part 11 had modified the default FS2004 scenery to represent the appearance of Taoyuan International Airport as it was in the real world by the end of year 2010. Enjoy a crowded RCTP and have fun!

Features

1. For FS2004 Only.
2. Many airport facility custom made by gMax.
3. Nearby landmarks.
4. Photo real ground texture.
5. Modified AfCAD to align Taoyuan Airbase (RCGM) runway with photo ground texture.

Installation

1. Though we strongly recommend you install all el Formosa – Taiwan Scenery Project sceneries, before installation, please make sure you have correctly installed el Formosa – Taiwan Scenery Part1, Part3, Part4, Part6, Part7, and Part 8 previously at the minimum. This scenery is NOT compatible with default Taiwan terrain. Please download them from AVSIM.
2. Drop folders "Addon Scenery" and "Effects" to your FS9 master folder.
3. Run FS9 and add “RCTP” to active scenery list.
4. Close FS9, and then re-start FS9 again.
5. Done!!

6. Optional fuel truck can automatically fuel up 100% full tank when parking aircraft close to it. If you like to add fuel truck to your RCTP, just drop both “scenery” and “texture” folders to “RCTP” folder.

Credits

Special thanks to

- Original RCTP models by Houting Chiang and Mike Huang.
- <http://www.flyways.info> for their apron light effects.
- Guy Diotte for his F-104 and F-5 static model, Arno Gerretsen for his C-47 static model, Mike Huang for his T-CH-1 model.
- And all Jade Air <http://www.jadeair.com.tw/discuz/index.php> friends who help for information, photos, and suggestion.
