General Information

Location: Beauvais Fra
IATA Code: BVA
Lat/Long: N49° 27.3' E002° 06.8'
Elevation: 359 ft

Airport Use: Public
Magnetic Variation: 0.3°W

Fuel Types: 100 Octane (LL), Jet A-1
Customs: Yes
Airport Type: IFR
Landing Fee: Yes
Control Tower: Yes
Jet Start Unit: No
LLWS Alert: No
Beacon: No
Pattern Altitude: 1000 ft AGL

Sunrise: 0501 Z
Sunset: 1843 Z,

Runway Information

Runway: 04
Length x Width: 2323 ft x 82 ft
Surface Type: paved
TDZ-Elev: 341 ft

Runway: 12
Length x Width: 7972 ft x 148 ft
Surface Type: maca
TDZ-Elev: 352 ft
Lighting: Edge, ALS, Centerline, TDZ
Displaced Threshold: 144 ft

Runway: 22
Length x Width: 2323 ft x 82 ft
Surface Type: paved
TDZ-Elev: 359 ft

Runway: 30
Length x Width: 7972 ft x 148 ft
Surface Type: maca
TDZ-Elev: 297 ft
Lighting: Edge, ALS, Centerline

1. GENERAL

1.1. ATIS

*ATIS 118.37

1.2. NOISE ABATEMENT PROCEDURES

1.2.1. GENERAL

In order to reduce noise nuisance in the vicinity of Beauvais (Tilly) APT, pursuant to the provisions of articles L.227.4 and R.221.3 of Civil Aviation Code; following restrictions are decided:

- Between 0000-0500LT of departure from or arrival on parking area no ACFT may take-off or land.
- "The noisiest ACFT of Chapter 3" - turbojet ACFT whose noise certification is according to ICAO Annex 16, Volume I, Part II, Chapter 3 and which have an accumulated margin of the certified noise level, with respect to permissible noise limits defined in this Chapter, being less than 5 EPNdB:
Between 2200-0000LT and 0500-0700LT of departure from or arrival on parking area none of "The noisiest ACFT of Chapter 3" may take-off or land.

The Captain can depart from the above restrictions only if the Captain considers that it is absolutely necessary for flight safety reasons.

Exempted from the above restrictions are:

- ACFT operating for ambulance and humanitarian transport;
- ACFT in emergency situations due to flight safety reasons;
- ACFT mentioned in article L.110.2 of Civil Aviation Code;
- ACFT operating government mission.

1.2.2. REVERSE THRUST

Reverse thrust is prohibited except for safety reasons or operational necessity left to the appreciation of the Captain.

1.2.3. AUXILIARY POWER UNITS (APUs)

The use of APU is limited to 20 minutes after landing, 30 minutes before take-off and no more than 45 minutes non-stop.

1.3. TAXI PROCEDURES

For Wing Span Restrictions refer to 10-9 charts.

1.4. OTHER INFORMATION

Birds in vicinity of APT. Wildlife strike hazard.
RWYs 04 and 30 right-hand circuit.

2. ARRIVAL

2.1. CAT III OPERATIONS

RWY 12 is approved for CAT III operations, special aircrew and ACFT certification required.

Operation of any ACFT wishing to conduct CAT III operations on RWY 12 shall conduct a demonstration program acceptable operating its supervisory authority.

2.2. OTHER INFORMATION

2.2.1. COMMUNICATION FAILURE PROCEDURE

Follow authorized or planned STAR according to the known or estimated landing direction.

In case of radar guidance, get back to the initial STAR.

Proceed to IAF at the last assigned and acknowledged level, if this level usable in holding pattern, or otherwise the highest level in holding.

Stay in this holding at this level until the latest time of the following:

- EAT,

- Arrival time in the holding pattern plus 10 minutes, then descend in holding pattern to the lowest holding level.

Leave IAF at this level to perform approach procedure until landing.

3. DEPARTURE

3.1. NOISE ABATEMENT PROCEDURES

For additional depiction refer to 10-4.

3.1.1. RUNWAY USAGE

It is preferable to use RWY 12 unless operational conditions do not allow it. The ACFT shall choose the configuration and climb setting corresponding to noise abatement as per the operational conditions at the time. The flight should be performed so as to reach a height of 3000' AAL as quickly as possible.

3.2. OTHER INFORMATION

3.2.1. COMMUNICATION FAILURE PROCEDURE

RNAV SIDS

Follow departure route and assigned levels up to PGS 28 DME or CGN, then continue the flight in accordance with the current flight plan.

SIDS

Follow the last clearance then:

- to ABB or MTD: from TMA boundary follow the route as stated in the current flight plan.
- other departures: follow the instructions as in SID.

DEPARTURE (POGO)

Follow via DEPARTURE (POGO) at the last assigned altitude until the descent.

Apt Elev
359'

Alt Set: hPa Trans level: By ATC Trans alt: 5000'
The published minimum altitudes integrate a correction for low temperatures.

RNAV ARRIVAL INSTRUCTIONS

1. Protection

RNAV arrivals are protected for RNAV 1 navigation based on GNSS and/or DME/DME sensors.

Enroute and 'IAF' holding patterns are mainly protected with RNAV 'manual mode' but also for conventional navigation between FL70 and FL110 when radionavigation infrastructure enables it.

2. Equipment

The equipment must be approved for RNAV operations based on GNSS and/or DME/DME sensors.

3. Operating procedure/Loss of RNAV capability

STAR published RNAV are to be filed with 'RNAV 1' navigation mode.

In case of loss of RNAV capability, the pilot must report 'NON RNAV 1' as soon as the required navigation precision is lost in order to get radar guidance.

Any change in speed or flight level shall be subject to clearance issued by ATC or on pilots request.

On STAR or radar guidance, the pilot shall adapt the descent profile in order to observe the published requirements. If unable inform ATC.

RNAV DEPARTURE INSTRUCTIONS

1. RNAV DEPARTURES

1.1. Protection

Initial departures are only protected in conventional navigation.

RNAV departures are protected only for RNAV 1 navigation based on GNSS and/or DME/DME sensors.

1.2. Equipment

The equipment must be approved for RNAV operations within Terminal Area (including SIDs) based on the following sensors:

GNSS and/or DME/DME.

ATC provides permanently radar services.
