

DOMODEDOVO 2011 SCENERY

FREWARE SCENERY FOR MICROSOFT FLIGHT SIMULATOR

ALPHA VERSION

About airport

Moscow Domodedovo Airport is Russia's largest airport in terms of passenger traffic. Total passenger traffic of the airport in 2010 made 22 million 254 thousand.

Currently 77 airlines offer regular flights to Domodedovo, including 36 foreign, 29 Russian and 12 air carriers from CIS countries. Flights from Domodedovo airport cover 241 national and international routes, 92 of them are unique for Moscow region – only from Domodedovo one can take these flights.

Largest Russian and foreign air carriers list the airport as their partner and connect Moscow to hundreds of cities all over the globe. Variety of destinations in the route network together with technology employed form a unique transfer potential of the airport.

Domodedovo airport is the only one in Russia equipped with two parallel runways positioned at such a distance from one another that makes their simultaneous independent operation possible. Airfield is certified to accept 177 types of aircrafts – from business aviation aircrafts to passenger and cargo supergiants (Like A380).

About scenery

This scenery is specifically created for Moscow RFE 2011. This is alpha version of scenery and has some bugs.

First of all, scenery has only summer photo terrain. Taxiway marking isn't finished. Apron hasn't got night textures. There are no stands and gates numbers. Please taxi carefully.

Installation:

Copy UDD folder to FS path\Addon Scenery and add to Flight Simulator scenery library.
