Airport Information For UDD

Terminal Charts For UDD

Revision Letter For Cycle 01-2015

Change Notices

Notebook

General Information

Location: Moscow Rus
IATA Code: DME
Lat/Long: N55° 24.5' E037° 54.4'
Elevation: 593 ft

Airport Use: Public
Magnetic Variation: 10.5°E

Fuel Types: Jet A-1
Repair Types: Major Airframe, Major Engine
Customs: Yes
Airport Type: IFR
Landing Fee: Yes
Control Tower: Yes
Jet Start Unit: Yes
LLWS Alert: No
Beacon: No

Sunrise: 0554 Z
Sunset: 1314 Z,

Runway Information

Runway: 14L
Length x Width: 12444 ft x 174 ft
Surface Type: concrete
TDZ-Elev: 551 ft
Lighting: Edge, ALS, Centerline

Runway: 14R
Length x Width: 11483 ft x 197 ft
Surface Type: concrete
TDZ-Elev: 593 ft
Lighting: Edge, ALS, Centerline, TDZ

Runway: 32L
Length x Width: 11483 ft x 197 ft
Surface Type: concrete
TDZ-Elev: 531 ft
Lighting: Edge, ALS, Centerline

Runway: 32R
Length x Width: 12444 ft x 174 ft
Surface Type: concrete
TDZ-Elev: 519 ft
Lighting: Edge, ALS, Centerline, TDZ

1. GENERAL

1.1. ATIS

ATIS 128.3
122.95 (Russian)

1.2. NOISE ABATEMENT PROCEDURES

Noise abatement procedures shall be executed by all ACFT.

1.3. LOW VISIBILITY PROCEDURES

1.3.1. GENERAL

- Preparation: RVR less than 800m at least at one of the three measuring points and/or CEILING is 80m or below.
- Activation: RVR less than 600m at least at one of the three measuring points and/or CEILING is 60m or below.
- Termination: RVR TDZ is more than 800m at all three measuring points and CEILING is above 80m.

Taxiing of ACFT shall be carried out only along TWYs with CL lights switched on. The responsibility for the unsanctioned incursion onto the RWY and non-adherence to the assigned taxi routes on the manoeuvring area shall be placed on the flight crew.

1.3.2. ARRIVING ACFT

After landing, pilots shall choose the nearest suitable TWY for the RWY vacation. Exits from the ILS critical area from RWY 14R towards TWY M (via TWYs A7, A8, A9 or A11) and from RWY 32R towards the apron (via TWYs B3 or B1) are equipped with color coded (alternating yellow/green) TWY centerline lights.

The ACFT must vacate the ILS critical area as soon as possible.

The flight crew shall report the RWY vacation to DOMODEDOVO Tower only after passing the last yellow light of TWY centerline that means the vacation of ILS critical area.

After landing on RWY 14R the flight crew must vacate the RWY along TWY A7, A8, A9 or A1:

- When vacating RWY along TWY A7:
After report to DOMODEDOVO Tower about the vacation of ILS critical area, the flight crew shall, by his instruction, change over to communication with DOMODEDOVO Apron and under his control continue to proceed to the last green light of the centerline of Taxi Route H2, where the flight crew must stop and wait unless otherwise instructed by DOMODEDOVO Apron. Further taxiing of ACFT shall be carried out only after the Follow-me car.
- When vacating RWY along TWY A8, A9 or A11:
After report to DOMODEDOVO Tower about the vacation of ILS critical area, the flight crew shall continue to proceed under their control along TWY M to the last green light of the TWY centerline of Taxi Route H2, where the flight crew must stop and wait unless otherwise instructed by DOMODEDOVO Tower. By the instruction of DOMODEDOVO Tower the flight crew shall change over to communication with DOMODEDOVO Apron and report the ACFT position (TWY or Taxi Route) and the availability of the Follow-me car in front of the ACFT using the following phraseology:
"DOMODEDOVO Apron + ACFT callsign + TWY or Taxi Route + Follow-me car is in front of us".
Further taxiing of ACFT shall be carried under control of DOMODEDOVO Apron. Reaching of the stand by the ACFT shall be reported by the flight crew to DOMODEDOVO Apron using the following phraseology:
"ACFT callsign + on stand number".

1. GENERAL

After landing on RWY 32R the flight crew must vacate the RWY only along TWY B3 or TWY B1:

- When vacating RWY along TWY B3:

After report to DOMODEDOVO Tower about the vacation of ILS critical area, the flight crew shall continue to proceed to the last green light of TWY centerline where the flight crew must stop and wait unless otherwise instructed by Tower. Further taxiing of ACFT shall be carried out under control of DOMODEDOVO Apron and only after the Follow-me car.

- When vacating RWY along TWY B1:

After report to DOMODEDOVO Tower about the vacation of ILS critical area, the flight crew shall, by his instruction, change over to communication with DOMODEDOVO Apron and under his control continue to proceed to the last green light of the centerline of Taxi Route T1, where the flight crew must stop and wait unless otherwise instructed by DOMODEDOVO Apron. Further taxiing of ACFT shall be carried out only after the Follow-me car.

1.3.3. DEPARTING ACFT

The flight crew of departing ACFT shall carry out taxiing only along the TWYs equipped with TWY centerline lights. In case of a failure of TWY centerline lights or the stop bars the flight crew must carry out taxiing only after the Follow-me car.

Taxiing of ACFT on the apron shall be carried out only after the Follow-me car under control of DOMODEDOVO Apron.

During taxiing on the apron and on the manoeuvring area, the flight crew should constantly check the ACFT position, especially at TWY intersections, to be sure that taxiing is carried out under the conditions of complete safety. In case of difficulty or doubt in determining the ACFT position, it is necessary to stop taxiing and report this to DOMODEDOVO Apron or to DOMODEDOVO Tower.

The RWY holding positions at RWY 14L (TWY B1), RWY 14R (TWY A2), RWY 32L (TWY A11) and RWY 32R (TWY B8) are designated by stop bars. Each stop bar consists of eight lights located across the TWY with equal intervals between the lights of 10'/3m, showing red in the intended direction of approach to the RWY holding position.

The flight crew should repeat all instructions of Tower concerning holding at the RWY.

After receiving the line-up clearance, the flight crew must start taxiing only after switching off the stop bar. Crossing the switched-on stop bar by the ACFT is prohibited.

During the operation of LVP the following is prohibited:

- take-off from intersections of TWY and RWY;
- take-off without stopping at the line-up position after taxiing to the RWY.

1.4. RWY OPERATIONS

Only RWY 14R/32L available for take-off and landing of A380 ACFT.

1. GENERAL

1.5. TAXI PROCEDURES

Taxi Routes 25 (TR 25), 35 (TR 35), 36 (TR 36) and H2 (TR H2) from Taxi Route 36 (TR 36) to Taxi Route 25 (TR 25) MAX wingspan 262'/80m.

Taxi Routes T1 (TR T1) and 2 (TR 2) and H2 (TR H2) from Taxi Route 25 (TR 25) to stand 52 MAX wingspan 240'/73.3m.

Taxi Routes 26 (TR 26), 27 (TR 27), 3 (TR 3) from stand 74 to start-up point 34 and H1 (TR H1) from Taxi Route T1 (TR T1) to Taxi Route 3 (TR 3) MAX wingspan 213'/65m.

Taxi Route H3 (TR H3) from Taxi Route T2 (TR T2) to start-up point 15 MAX wingspan 166'/50.5m.

Taxi Route H3 (TR H3) from start-up point 13 to stand 61 MAX wingspan 157'/48m.

Taxi Route H3 (TR H3) from stand 61 to the point of temporary parking 61B MAX wingspan 142'/43.3m.

Taxi Route A10 (TR A10) MAX wingspan 118'/36m.

Taxiing along Taxi Routes 30 (TR 30) and 31 (TR 31) under own engines power is prohibited.

Do not stop on Taxi Route T2 (TR T2) between TWYs B3 and B4.

Taxiing along Taxi Routes T1 (TR T1) and T2 (TR T2) and TWYs A5 thru A8, B1 thru B8 and T2 strictly along centerline with inner engines power.

Taxiing along Taxi Routes H2 (TR H2) and 25 (TR 25) with outer engines power, after Follow-me car.

Use Taxi Route T2 (TR T2) between TWY B5 and Taxi Route H2 (TR H2) at reduced speed with Follow-me car.

TWYs B5 and B7 MAX turn radius 82'/25m before take-off from RWY 32R after landing on RWY 14L.

For safety reasons taxi along apron, not exceeding IDLE power.

Taxiing of wide-body ACFT along TWYs P4 and P6 under inner engines power. Outer engines power not above IDLE.

ACFT taxiing along TWY M shall give way to ACFT vacating the RWY.

ACFT shall give way to ACFT taxiing along TWY M (except the above-mentioned rule).

1.6. PARKING INFORMATION

Stands 1 thru 22 equipped with visual docking guidance system SAFEDOCK. Enter with MAX 4m/sec.

Stands 41, 41A, 42, 86 and 119 thru 120A available for run-up.

Parking of helicopters onto stands and helipads by towing.

1.7. OTHER INFORMATION

Birds.

2. ARRIVAL

2.1. NOISE ABATEMENT PROCEDURES

Crews shall maintain the prescribed STAR routes, and, in case of deviation from them, join the assigned track immediately.

APPROACH PROCEDURE

RWY 32L/R are noise preferential RWYs and shall be used to the greatest extent possible.

If special meteorological conditions are present in arrival and approach sectors, the flight crew can deviate from STAR route with mandatory report about it to ATC.

Limitations

Immediately prior to the final approach pilots should avoid excessive rates of descent.

Change of flight configuration and speed shall be carried out according to the requirements of the Airplane Flight Manual.

During instrument as well as visual approach it is not allowed to fly below ILS GS.

Noise abatement procedures shall not envisage the increasing of indicated rate of descent.

A displacement of THR shall not be used as a noise abatement measure.

'AIR GROUND' communication shall be reduced to absolute minimum.

2.2. CAT II/III OPERATIONS

RWYs 14R and 32R approved for CAT II/III operations, special aircrew and ACFT certification required.

2.3. SPEED RESTRICTIONS

- 250 KT below FL100 to TL;
- 220 KT after passing RW, AO, DR, GEKLA and LO from TL to 3550'(2957');
- 180 KT from 3550'(2957') to completing turn onto final;
- 160 KT from completing turn onto final to distance 3.8NM from RWY THR.

Speed restriction after entry MOSCOW TMA from the moment of commencing descent from FL:

- MAX 280 KT +/- 10 KT or Mach 0.8 whichever is less from cruising FL to FL250;
- MAX 270 KT +/- 10 KT below FL250 to FL100;
- MAX 250 KT +/- 10 KT below FL100 to TL.

Below transition level, IAS shall be as in accordance with the Aeroplane Flight Manual without exceeding IAS indicated in limitations section. The above mentioned IAS shall be maintained by the flight crew unless otherwise instructed by ATS unit or by the established approach procedure.

If unable to maintain the above mentioned IAS, the flight crew shall report it to ATS unit.

2.4. RWY OPERATIONS

2.4.1. MINIMUM RWY OCCUPATION TIME

To reduce the time of RWY occupation the flight crews of landing ACFT are required to determine the nearest rapid exit TWY for safe and quick RWY vacation.

In those cases when it is necessary or desirable to expedite traffic, the flight crew executing landing may be instructed by DOMODEDOVO Tower:

- To carry out landing beyond the RWY touchdown zone;
- To vacate the RWY along the indicated TWY;
- To expedite the RWY vacation.

2. ARRIVAL

Depending on the meteorological conditions and RWY condition, RWY vacation along TWY must be planned by the flight crew considering the available distances shown in the table below:

RWY	TWY	Angle of taxiing off	ACFT	Distance from RWY extremity to taxiing off TWY, ft/m
14L	B8	90°	all	11,463'/3495m
	B7			8249'/2515m
	B6	40°		7134'/2175m
	B5		medium	6363'/1940m
	B4	40°	light/medium	5182'/1580m
	B2	90°	light	2709'/ 826m
14R	A11	90°	all	11,480'/3500m
	A9	30°		8708'/2655m
	A8	30°		7216'/2200m
	A7	30°	light/medium	5740'/1750m
32L	A2	90°	all	11,480'/3500m
	A4	30°		8708'/2655m
	A5	30°		7216'/2200m
	A6	30°	light/medium	5740'/1750m
32R	B1	90°	all	12,441'/3793m
	B2	90°		11,463'/3495m
	B3	40°		7970'/2430m
	B5	40°	light/medium	6068'/1850m

After landing the flight crew is not obliged to report to Tower about executed landing and RWY vacation (with the exception of low visibility procedures) if the flight crew has not received such instruction from the controller.

After landing the flight crew must vacate the RWY without delays at safe speed of taxiing off the RWY along the TWY assigned earlier. The speed of RWY vacation along rapid exit TWYs shall not exceed 50 KT at the point of turning (TWY centerline adjoins the RWY centerline).

2.5. TAXI PROCEDURES

2.5.1. GENERAL

Signs of exit from RWY 14L/R and 32L/R are located 98'/30m thru 115'/35m before RWY exit points.

2.5.2. TAXI ROUTINGS TO VACATE RWY

The flight crew shall use the following taxi routes unless otherwise instructed by DOMODEDOVO Tower:

After landing on RWY 14L:

- vacate the RWY to the Right along TWY B2 (for light ACFT);
- vacate the RWY to the Right along rapid exit TWY B4, then turn Right along TWY B5 to TWY T2 towards the apron;
- vacate the RWY to the Right along TWY B5 (with the radius of turn not more than 82'/25m), then turn Right to TWY T2 towards the apron;
- vacate the RWY to the Right along rapid exit TWY B6, then turn Right along TWY B7 to TWY T2 towards the apron;
- vacate the RWY to the Right along TWY B7 (with the radius of turn not more than 82'/25m), then turn Right to TWY T2 towards the apron;
- vacate the RWY to the Right along TWY B8, then turn Right to TWY T2 towards the apron.

2. ARRIVAL

After landing on RWY 14R:

- vacate the RWY to the Left along rapid exit TWY A7;
- vacate the RWY to the Left along rapid exit TWY A8 or A9, then turn Left to TWY M and proceed to Taxi Route H2;
- vacate the RWY to the Left along TWY A11, then turn Left to TWY M and proceed to Taxi Route H2.

After landing on RWY 32L:

- vacate the RWY to the Right along rapid exit TWY A6, A5 or A4, then turn Right to TWY M and proceed to Taxi Route H1;
- vacate the RWY to the Right along TWY A2, then turn Right to TWY M and proceed to Taxi Route H1.

After landing on RWY 32R:

- vacate the RWY to the Left along rapid exit TWY B7 (for light ACFT) or B5, then turn Right to TWY T2 towards the apron;
- vacate the RWY to the Left along the rapid exit TWY B3;
- vacate the RWY to the Left along TWY B2;
- vacate the RWY to the Left along TWY B1.

When RWY 32R is in use for take-off and landing, for the purposes of avoiding the conflict opposite movement during taxiing, the flight crew shall vacate RWY after landing along TWY B7 or B5 only in case when on final leg Tower recommended this TWY to vacate the RWY.

After the RWY vacation the ACFT shall not stop on TWY for the purpose of expecting for the instructions of DOMODEDOVO Tower, but shall continue taxiing along the established taxi routes unless otherwise instructed by DOMODEDOVO Tower.

2.5.3. FREQUENCY CHANGE

Change of frequency during taxiing shall be carried out by the flight crew only by request. Unless otherwise instructed by DOMODEDOVO Tower, the flight crew must stop and request for a change of frequency as follows:

- after landing on RWY 14L - on TWY T2 opposite TWY B5 or at the end of TWY B2 (for light ACFT);
- after landing on RWY 14R - at the end of TWY A7 or on TWY M in front of Taxi Route H2;
- after landing on RWY 32L - on TWY M in front of Taxi Route H1;
- after landing on RWY 32R - at the end of TWY B5, B3, B2 or B1 and also during RWY vacation along TWY B7 (for light ACFT) - on TWY T2 opposite TWY B5.

A change of frequency shall be carried out when approaching the transfer of control limit between DOMODEDOVO Tower and DOMODEDOVO Apron.

The instruction about the change of frequency shall be carried out immediately with mandatory confirmation.

Further taxiing on the apron to the assigned stand shall be carried out strictly by the instruction of DOMODEDOVO Apron.

2.6. OTHER INFORMATION

2.6.1. GENERAL

On initial radio contact DOMODEDOVO Radar and DOMODEDOVO Tower the flight crew of ACFT having the category of turbulence wake as heavy, shall pronounce the word "Heavy" after the callsign of the ACFT.

At night and also when visibility is 2000m or less during RWY 14R or 14L approaches the lighted highway shall not be confused with the RWY lights.

On initial radio contact with DOMODEDOVO Tower the flight crew shall report only the ACFT callsign using the following phraseology: "Domodedovo-Tower + ACFT callsign".

3. DEPARTURE

3.1. DE-ICING

The procedure of de-icing treatment of ACFT shall be carried out:

- at engines start-up positions;
- on ACFT stands and points of temporary parking;
- on de-icing areas DA1 and DA2.

DOMODEDOVO Apron shall be notified by the flight crew about the necessity of de-icing treatment on first radio contact.

The order of getting the requests for de-icing treatment does not influence the order of priority of de-icing treatment itself.

When de-icing treatment is carried out at engines start-up position, engines start-up is possible with the permission of DOMODEDOVO Apron and technical specialist responsible for engines start-up after completing the treatment of ACFT tail part and during wing treatment.

De-icing treatment of propeller-driven ACFT with operating engines is prohibited on de-icing areas DA1 and DA2.

In case when the safety of engines start-up is not provided or the safety of the ACFT movement with started up engines to de-icing areas DA1 and DA2 is not provided, then the flight crew has the right to cancel de-icing treatment of ACFT with started up engines.

After reaching the transfer of control limit, the flight crew shall change over to communication with DOMODEDOVO Tower.

The flight crew shall change over to communication with DOMODEDOVO Apron at junction of TWY M with DA1 and DA2, by the instruction of DOMODEDOVO Tower.

Taxiing into/out of de-icing areas DA1 and DA2 shall be carried out only under minimum engines power.

The flight crew must exercise extreme caution with regard to the personnel and transport facilities connected with execution of de-icing treatment. The control over the ACFT taxiing into de-icing areas shall be carried out by a specialist of the apron service.

After taxiing into the assigned stand on DA1 and DA2 the flight crew shall change over to communication with DOMODEDOVO De-icing on frequency 130.600 MHz, by the instruction of DOMODEDOVO Apron.

The flight crew must report DOMODEDOVO Apron about the commencement of de-icing treatment of ACFT.

After getting the code the flight crew shall change over to communication with DOMODEDOVO Apron and report about readiness for taxiing.

Taxiing out of de-icing area shall be carried out only after getting the permission of DOMODEDOVO Tower.

3. DEPARTURE

3.2. START-UP, PUSH-BACK & TAXI PROCEDURES

3.2.1. GENERAL

On first radio contact with DOMODEDOVO Clearance, DOMODEDOVO Apron and DOMODEDOVO Tower the flight crew of ACFT, having the category of turbulence wake as heavy, shall pronounce the word "Heavy" after the callsign of the ACFT. To obtain ATC clearance the flight crews of departing ACFT shall contact DOMODEDOVO Clearance 10 MIN before estimated time of engines start-up under condition that ACFT is completely ready for departure:

- report the ACFT callsign, the destination aerodrome, the ACFT type, stand number, the code of the confirmed ATIS information, the necessity of de-icing treatment;
- receive ATC clearance, RWY for take-off, QNH (by request);
- receive the information relating to the procedure of simultaneous independent departures from the parallel RWYs;
- ATC clearance is valid 30 MIN from clearance receipt.

After complete readiness for departure the flight crew shall change over to communication with DOMODEDOVO Apron, by the instruction of DOMODEDOVO Clearance, to get clearance for engines start-up and taxiing (towing), indicating the stand number.

ACFT completely ready for departure means that all passengers are on board, the entrance and cargo doors are closed, the stairs are taken away (the aerobridge is disconnected and is in a retracted position), a tow bar is connected (when towing is required), ground personnel is ready for towing (taxiing) and has established radio contact with the flight crew.

The flight crew shall switch on transponder mode S before towing or engines start-up request and switch off after taxiing into stand.

Engines start-up can be carried out by a flight crew in the process of towing if this procedure is envisaged by the Aeroplane Flight Manual (AFM) and coordinated with the technical personnel of the tow team.

After engines start-up the flight crew shall report DOMODEDOVO Apron about readiness to taxi using the following phraseology: "ACFT callsign + Ready to taxi" and receive the instructions about the taxi procedure on the apron.

3.2.2. FREQUENCY CHANGE

When giving taxi instructions on the apron, DOMODEDOVO Apron can assign the transfer of control limit to change over to communication with DOMODEDOVO Tower, using the following phraseology: "ACFT callsign + RWY + Taxi routing + Tower frequency".

The flight crew shall independently change over to communication with DOMODEDOVO Tower at the established limit.

After changing over from frequency of DOMODEDOVO Apron to the frequency of DOMODEDOVO Tower, the flight crew shall watch his frequency without calling DOMODEDOVO Tower (except for LVP procedures) and carry out taxiing to the RWY holding position. The flight crew must be ready for getting further instructions and permissions from DOMODEDOVO Tower.

3.2.3. TAXI ROUTINGS

The standard taxi routes to the RWY holding position (holding position in front of the RWY) are as follows:

- for RWY 14L - along Taxi Route T1 to TWY B1;
- for RWY 14R - along Taxi Route H1/H2, then along TWY M to TWY A2;
- for RWY 32L - along Taxi Route H1/H2, then along TWY M to TWY A11;
- for RWY 32R - along TWY T2 to TWY B8.

When taxiing to RWY holding position along other taxi routes, different from the standard ones, the flight crew must request for occupation of TWY M from DOMODEDOVO Tower.

3. DEPARTURE

3.2.4. INTERSECTION DEPARTURES

Depending on the air and ground situation, it is allowed to execute take-off from the intersection of TWY and the RWY by flight crew's request or by request of DOMODEDOVO Tower, using the following take-off run distances available:

RWY	Intersection of TWY and RWY	TORA	ACFT
14L	B1	12,441'/3793m	all
	B2	9544'/2910m	
	B3	7970'/2430m	
14R	A2	11,480'/3500m	all
	A4	8708'/2655m	
	A5	7216'/2200m	
	A6	5740'/1750m	light/medium
32L	A11	11,480'/3500m	all
	A9	8708'/2655m	
	A8	7216'/2200m	
	A7	5740'/1750m	light/medium
32R	From beginning of RWY	12,441'/3793m	all
	B8	11,463'/3495m	
	B7	8249'/2515m	
	B6	7134'/2175m	
	B5	6363'/1940m	light/medium
	B4	5182'/1580m	light/medium

On initial radio contact with DOMODEDOVO Tower the flight crew can report about its readiness to taxi to the RWY along suitable TWY and execution of the non-stop take-off, after that receive the instructions on further taxiing from DOMODEDOVO Tower.

The absence of such report shall mean for DOMODEDOVO Tower that the flight crew of the given ACFT intends to execute take-off from the RWY beginning.

The flight crew which requires backtracking (including the line-up position on RWY 32R from TWY B8) must report DOMODEDOVO Tower about it on reaching the RWY holding position.

The flight crew of the ACFT, which is at the RWY holding, must be ready to line up and start take-off run immediately after receiving the clearance.

3. DEPARTURE

3.3. RWY OPERATIONS

3.3.1. MINIMUM RWY OCCUPATION TIME

Prior to reaching the line-up position the flight crew shall inform DOMODEDOVO Tower if unable to carry out the instruction to reduce the time of the RWY occupation and about the required time for preparation.

Pre-flight checks in the crew cabin must be completed by the flight crew prior to occupation of the line-up. The checks to be executed during the ACFT stay on the RWY shall be reduced to a minimum.

If take-off is executed from the RWY beginning, the manoeuvre to line-up shall be carried out either immediately after the ACFT, which has started take-off run, or after the ACFT, which has crossed the RWY THR before landing.

If take-off is executed from the intersection of TWY and the RWY, the flight crew must start the manoeuvre to line-up immediately after the taking off (landing) ACFT has passed abeam the RWY holding position where the ACFT is getting ready for take-off from the intersection.

The flight crew shall execute take-off immediately after receiving take-off clearance.

The conditional clearances shall be used when the appropriate ACFT are visible to both DOMODEDOVO Tower and the flight crew. An ACFT, due to which a conditional clearance is issued, is the first ACFT to proceed before another relevant ACFT. The conditional clearance shall be issued in all cases in the following sequence and includes the following: "ACFT identification, instructions, clearance + short repetition of the instruction".

This means that the flight crew getting a conditional clearance is required to identify the ACFT, due to which a conditional clearance is issued.

3.4. NOISE ABATEMENT PROCEDURES

3.4.1. TAKE-OFF AND CLIMBING PROCEDURE

RWY 14L/R are noise preferential RWYs which shall be used to the maximum degree possible. Noise abatement procedures shall not be executed at the expense of reduction of flight safety.

Restrictions

During take-off from RWYs 32L/R pilots shall strictly comply with the established departure procedures to avoid overflying the residential areas of the APT and Domodedovo town.

Change of flight direction (course) after take-off is permitted only after reaching 990' (396').

Noise Abatement Procedures NADP1 and NADP2

Two variants of take-off and climb procedures are applied: NADP1 and NADP2 (ICAO Doc 8168, Volume 1, Part V, Chapter 3).

Control of ACFT Noise within the Aerodrome Area

Control over ACFT noise shall be maintained via the noise monitoring points. Noise level must not exceed 85 dB 0700-2300LT and 75 dB 2300-0700LT.

Noise Monitoring Points

N55 33.7 E037 52.5
N55 33.3 E037 43.9
N55 33.8 E037 38.7
N55 26.7 E037 44.9
N55 27.2 E037 44.6

DOCKING GUIDANCE SYSTEM (SAFEDOCK)

GENERAL

The system is formed by centerline indicators (Azimuth Guidance Unit), approach index and stop position indicator, so as alphanumeric indication, composed of a display unit, control and laser scanner at the top of a pole located at the parking axis extension in the surface of the apron, in front of the cockpit.

The display unit shows the following information types:

- Alphanumeric information: aircraft type, "OK", "STOP", "TOO FAR", "ID FAIL" and "DOWN GRAD".
- Indication of activated system: It is shown by mobile yellow arrows.
- Indication of aircraft capture: It is shown by a yellow "T", which vertical arm is the docking direction and the horizontal arm is the stop position.
- Indication of azimuth: The off-center respect to the docking direction is shown by a yellow arrow. A flashing red arrow shows the direction to correct.
- Indication of distance: The "T" vertical arm is going to be reduced from 39'/12m before the stop position. Each line of LEDs (light-emitting diode) represents 2'/0.5m approximately.
- Indication of stop: The "T" horizontal arm remains at 2'/0.5m to the stop position. When it is just reached, the display unit shows "STOP" and two rectangular groups of red LEDs will be on.

PILOT INSTRUCTIONS

- Check that the correct acft type is displayed.
The mobile arrows indicate that the system is activated.

- DOCKING
Follow the LEDs line.
When the "T" centerline indication becomes yellow, the acft is caught by the laser and being identified.

3. IDENTIFICATION

When the acft is at less than 39'/12m from the stop position, the display will show closing rate indicated by turning off one row of centerline indicator LEDs in front of the arrow for each 2'/0.5m advances into the gate.

The acft is approximately at 33'/10m from the stop position. The yellow acft symbol indicates acft LEFT of centerline and the flashing red arrow shows the turning direction.

The acft is approximately at 16'/5m from the stop position. The yellow acft symbol indicates acft RIGHT of centerline and the flashing red arrow shows the turning direction.

4. STOP

When the correct stop position is reached, the display shows "STOP" and the red LEDs will be on.

5. DOCKING ON

When the acft is correctly parked, the display unit will show "OK" some seconds later.

- If the acft has overshoot the stop position, "TOO FAR" will be displayed.

7. IDENTIFICATION FAILURE

The acft is identified during the entrance into the parking position. If for any reason the identification is not achieved "ID FAIL", the display will show "STOP" and "WAIT". If the acft is identified, docking can proceed. If not, the display will show "STOP".

8. SLOW DOWN

When the acft exceed the pre-programmed approach speed, the display unit will show "DOWN GRAD".
