AIRPORT BRIEFING

1. GENERAL**1.1. ATIS**

D-ATIS 124.3

1.2. NOISE ABATEMENT PROCEDURES**1.2.1. NIGHTTIME RESTRICTIONS**

Landing and/or take-off is forbidden between 0000 and 0600LT, except in cases of force majeure. However, according to governmental deliberation, exception regime has been granted for Porto APT in which landing and/or take-off of ACFT engaged in commercial aviation or aerial work are allowed in a limited number.

The authorisation for air movements during this period is conditioned to:

1. The maximum number of movements allowed
(11 daily, 70 weekly, 2100 yearly).
2. The noise level of the ACFT concerned, in compliance with ICAO:

Noise Level Band (EPNdB)	QUOTA Count
below 87	0
87 - 89.9	0.5
90 - 92.9	1
93 - 95.9	2
96 - 98.9	4
99 - 101.9	8
more than 101.9	16

- a) ACFT classified Level 16, cannot be scheduled between 0000-0600LT;
- b) ACFT classified Level 4 and 8, cannot be scheduled between 0200-0500LT.
3. ACFT authorised to land during the night period are strictly forbidden to reverse thrust right after landing.
4. The operating restrictions set out in item 1 shall not apply to the following cases:
 - a) ACFT operating humanitarian, emergency or evacuation missions;
 - b) ACFT to come across urgent situations, taking in account weather, technical failure or flight safety reasons;
 - c) Air movements subject to an unforeseen schedule alteration due to abnormal disturbance within Air Traffic Control;
 - d) Air movements operated up to 0100LT which were actually scheduled for periods up to 0000LT, due to delays for which neither the APT management company nor the operator were to blame;
 - e) Air movements from/to autonomous regions of Madeira and Azores, due to meteorological conditions;
 - f) Landings operated during the period comprised between 0500-0600LT, due to weather reasons, as far as the arrival had been scheduled for a time after 0600LT.
5. For the purpose of compliance with provision of item 2 above, the operator shall, when applying for a slot provide the information contained in the ACFT manufacturer's noise certificate.
6. Noise abatement procedures during approach, landing and take-off shall comply with standards and procedures set in ICAO PANSOPS Volume I and Portuguese AIP.
7. ACFT authorised to land and take off shall comply with technical characteristics according to ICAO Annex 16 Volume I, Chapter 3 and Portuguese AIP:
 - a) For landing: Approach to landing MS 9 equal X EPNdB;
 - b) For take-off: (take-off PS side-line) / 2 equal X EPNdB.

1. GENERAL

1.2.2. RUN-UP TESTS

Engine test runs in idle power may take place on stands.

Engine test runs above idle power will take place in a location designated by APT operations service. Test runs are allowed from 0600 to 2400LT on the condition that a previous authorization was obtained from APT operations service.

Operators shall indicate the real time of start and duration of the test.

1.3. LOW VISIBILITY PROCEDURES

ATC will apply safeguards and procedures for ILS operations that will become effective in relation to weather conditions as specified below:

- When VIS is less than 2500m and/or cloud base is below 400' ATC will instruct traffic to perform ILS approaches to RWY 17.
- When TDZ RVR is 800m or less and/or cloud base is at 200' or below ATC will ensure that the ILS protection area is clear of traffic before issuing landing clearance (normally at OM).

ATC will always give RVR value for position ALPHA (TDZ). ATC will only give RVR value for positions BRAVO & CHARLY if they are:

- less than TDZ and less than 800m; or
- less than 350m; or
- requested by the pilot.

Pilots who wish to practice ILS CAT II approach are to use the phrase:
"Request Practice CAT II Approach".

1.4. TAXI PROCEDURES

1.4.1. STANDARD TAXI ROUTES

STANDS	TAXI ROUTES (ARR/DEP)			
	ARR 17	ARR 35	DEP 17	DEP 35
S8 thru S12	B/S1	F/S6/S4/S2/S1	S2/S4/S6/F	B
S20 thru S25	B/S2	F/S6/S4/S2	S4/S6/F	B
S30 thru S37	B/S2/S3	F/S6/S4/S3	S4/S6/F	S2/B
S40 thru S43	C/S4	F/S6/S4	S6/F	S2/B
S38 and S50	C/S4	F/S6/S4	S6/F	S2/B
S51 thru S57	C/S4/S5	F/S5	F	S4/S2/B
S60 thru S66	C/S4/S6	F/S6	F	S4/S2/B
S70 thru S73	C/S4/S5	F/S5	F	S4/S2/B
T01 thru T04	J/Y/T	A3/Y/T	Y/A3	Y/A2/A1

1.5. PARKING INFORMATION

Stands S8 thru S12 and S30 thru S35 not visible from Tower.

AIRPORT BRIEFING

1. GENERAL

1.6. OTHER INFORMATION

1.6.1. GENERAL

Follow-me and marshaller assistance is compulsory during:

- Push-back under CAT II operations;
- Parking (only marshaller).

Birds in vicinity of APT.

First 4921'/1500m of RWY 35 not clearly visible from Tower.

1.6.2. USE OF APU

Start-up or shut-down of the APU is forbidden while the ACFT is being refuelled.

The use of APU must be limited as much as possible.

Narrow-body ACFT are allowed to use APU until 5 minutes after 'chocks on' and 10 minutes before ETD.

Wide-body ACFT are allowed to use APU until 10 minutes after 'chocks on' and 20 minutes before ETD.

Exemptions: If air conditioning system at the loading bridge is unserviceable.

2. ARRIVAL

2.1. SPEED RESTRICTIONS

Speed adjustments unless otherwise cleared by ATC:

- MAX 280 KT between FL 245 & FL 100;
- MAX 250 KT at or below FL 100;
- MAX 220 KT at or below FL 70;
- MAX 200 KT at or below 4000';
- MAX between 180 KT & 160 KT when established on final approach;
- MAX 160 KT until 4NM from THR.

Additionally, ATC may request specific speeds for accurate spaces.

Pilots are requested to comply with speed adjustments as promptly as feasible within their own operational constraints, advising ATC if circumstances necessitate a change of speed for ACFT performance reasons.

2.2. CAT II OPERATIONS

RWY 17 is approved for CAT II operations, special aircrew and certification required.

2.3. RWY OPERATIONS

Wide-body ACFT landing RWY 35 expected to use strengthened turning pad at northern end for turning on RWY.

2.4. PARKING INFORMATION

For Stand graphic refer to 10-9 charts.

2.4.1. DOCKING SYSTEM

Stands S10 thru S12, S30 thru S37, S50, S51 and S53 thru S55 provided with APIS.

AIRPORT BRIEFING

3. DEPARTURE

3.1. PUSH-BACK AND START-UP PROCEDURE

ACFT parked in a nose position only allowed outgoing with push-back. Use of reverse thrust of manoeuvring to and from a stand is not permitted.

ACFT in contiguous stands are not allowed to move simultaneously.

Engine start-up is only permitted after push-back manoeuvre with ACFT positioned in proper breakaway area. Breakaway areas markings are white triangles painted near the TWY centerline.

Whenever an ACFT APU is inoperative or not available one engine start-up is permitted on a nose in stand before starting push-back manoeuvring; in these circumstances Porto Control Tower must be advised and the start-up procedures will be assisted by Follow-me.

Pilots shall contact Tower for departure approval 10 minutes before start-up and shall provide call-sign, stand number, cruising level & ATIS acknowledge.

Pilots shall advise ATC, as soon as possible, if able for departure from a RWY intersection.

3.2. OTHER INFORMATION

Contact PORTO Approach immediately after take-off, unless otherwise instructed by PORTO Tower.

APIS (AIRCRAFT PARKING AND INFORMATION SYSTEM)

Display indicating: Company, "ETD", "UTC", ACFT type, "SLOW", "STOP", "OK", "CHCK" and "TOO FAR".

Display indicating: Flight number, time, ACFT series, "STOP", "ON" (chocks) and "DOWN".

Centerline beacon side-in guidance.

Closing-rate information. Full closing rate thermometer indicates at least 46'/14m to stop position.

Turn LEFT

Turn RIGHT

On centerline

PILOT INSTRUCTIONS

1. Follow TWY lead-in line and adjust according to the directions of the centerline beacon side-in guidance.
2. Check correct ACFT type is flashing and that centerline guidance and closing rate thermometer is activated. The flight number may also be presented.
3. Do not enter the stand if display presents STOP or wrong ACFT type.
4. Approximately 46'/14m before STOP, flight number will disappear if this is presented.
5. 62'/19m before STOP, ACFT type goes steady. If speed is too high, SLOW DOWN can be shown.
6. Full closing rate thermometer indicates at least 46'/14m to STOP. When ACFT has less than 46'/14m to STOP thermometer starts to move from bottom to top.
7. When stop position is reached, display indicates STOP and if ACFT is parked correctly, display indicates also OK.
8. If ACFT overshoots the limit for correct parking, display indicates TOO FAR. Push-back shall be necessary.
9. Displays and indicators automatically shut down after some seconds. After ON BLOCK, display can indicate UTC time and CHCK ON (chocks on).
10. 20 minutes before departure, flight number and ETD will be presented. The ETD is based on UTC time.
