

# Drzewiecki Design DEMO

Hello!  
Thank you for your interest in Drzewiecki Design products!

**Drzewiecki Design** is a company specializing in software development for flight simulators. We span the global market with a wide range of products and services, used for professional pilot training in FAA certified simulators as well as by flight simulation enthusiasts worldwide. We develop software for Microsoft Flight Simulator 2004, Microsoft Flight Simulator X, Laminar Research X-Plane and Lockheed Martin Prepar3D. Our team has been developing flight simulator software since 2003. The company was established in 2006 and was registered in 2008. Our team is made up of experienced specialists from all over the world. Thanks to advanced modeling and graphic technologies, detailed satellite data, large photographic resources and our specialized programming techniques, we can achieve an exceptionally realistic rendering of parts of the real world in flight simulators. With our products not only is IFR local procedure training possible, but also detailed familiarization with airport layouts and even VFR training with all, perfectly recognizable, distinctive ground objects.

**Drzewiecki Design DEMOs** provide convenient solutions for those customers unable of purchasing payware versions of our products.

DEMO versions of Drzewiecki Design products are developed for most Microsoft Flight Simulator 2004, Microsoft Flight Simulator X and Lockheed Martin Prepar3D products by Drzewiecki Design. Using these free demos ensures no anomalies during online (VATSIM, IVAO, multiplayer etc.) flying in case some users use payware, full versions and some don't.

Our DEMO sceneries should not be used for performance tests as they obviously include much less content than payware products!

In our DEMOs, which are fully functional freeware sceneries, you will find airport layouts perfectly aligned to those in payware products, however DEMO sceneries will feature less 3D objects, lower texture resolutions, possible low quality or no ground textures, no special animations, some non-textured objects, non manuals, no charts etc. On the other hand our DEMOs are extremely FPS-friendly and can be used even on very low-performance PCs.

It is recommended to uninstall our DEMOs prior to installing full versions, although in such cases they should be replaced automatically by our installers.

We wish you many hours of fun with our products!
